

Zeitronix Ethanol Content Analyzer

Winner of 1st Runner Up in the SEMA
“Best New Performance Racing Product” category,
and winner of a SEMA “Global Media Award”,
in a field of more than 2700 new products,
SEMA Auto Show 2009.

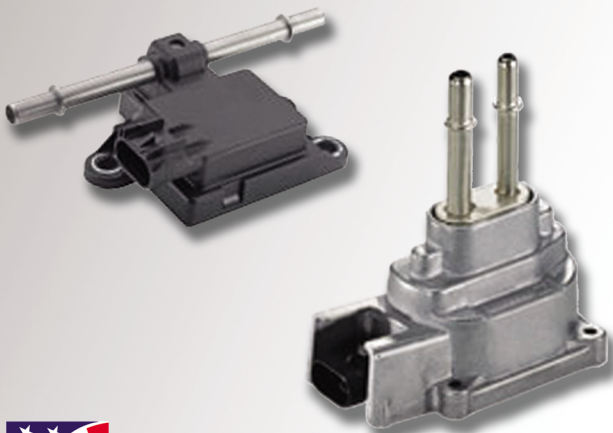

Ethanol Content Analyzer - Features

- Displays fuel ethanol content from 0% to 100%
- Displays fuel temperature in Fahrenheit or Celsius ranging from -40 to 125 F (-40 to 52 Celsius)
- Two analog outputs: Ethanol % and Fuel Temp. for logging or engine management systems
- Sleek aluminum enclosure with bright LED display visible even in direct sunlight
- Compatible with standard OEM sensors used in most flex fuel vehicles (FFV)
- 2.8 x 1.8 x 0.75 inches (71 x 46 x 19 mm)
- Made in the USA!

What's your E%?

The ethanol content of E85 fuel can vary from 60% to 92% ethanol. A fill up with E85 can drastically change the mix of fuel in your vehicle. For performance drivers determining actual ethanol content of E85 fuel is essential to maximizing an engine's tune and horsepower.

Why know your E%?

E85 has the equivalent octane rating of 105 octane gasoline (R+M)/2. Higher octane fuel is more resistant to knock allowing for more aggressive ignition timing, higher compression and increased engine power over gasoline itself. The Zeitronix Ethanol Content Analyzer helps you get the most out of your engine and fuel.
